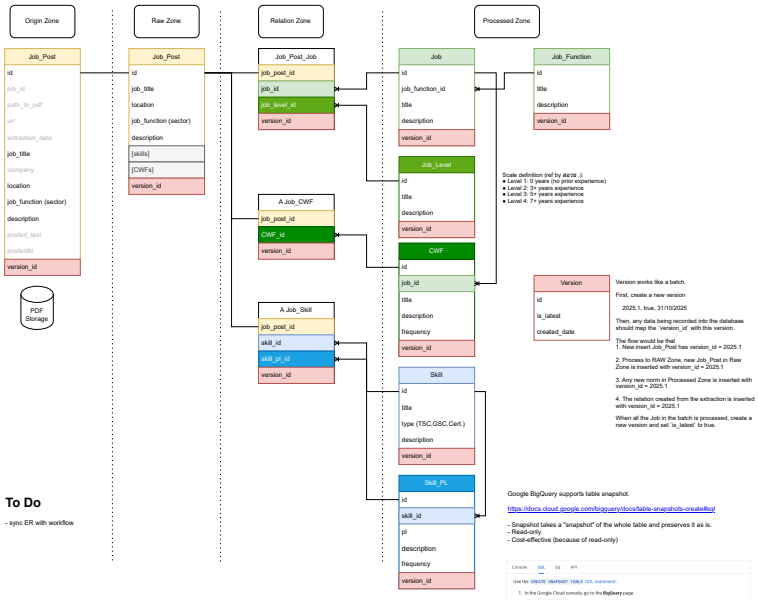
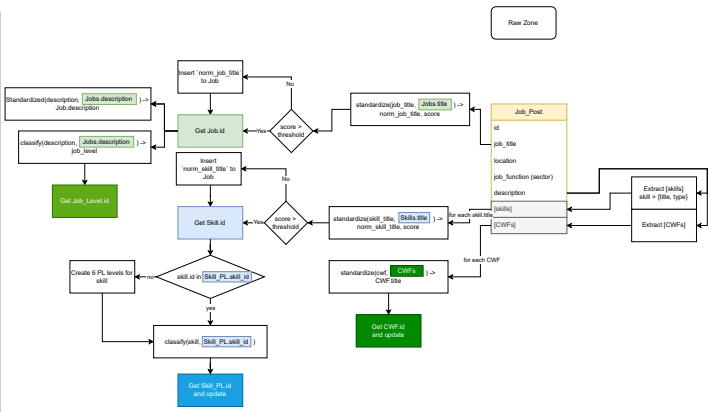
V3.2

- Add snapshot idea



To Do

- sync ER with workflow



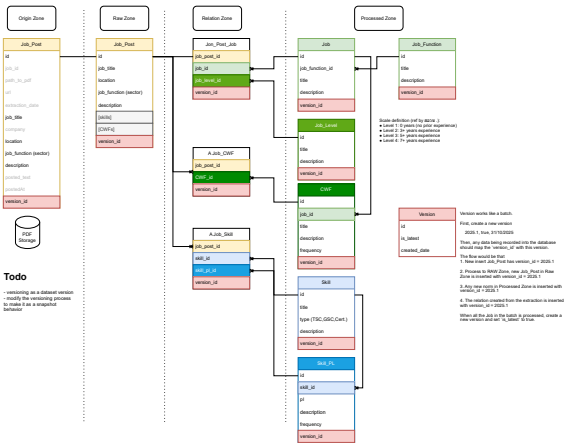
Google BigQuery supports table snapshot.

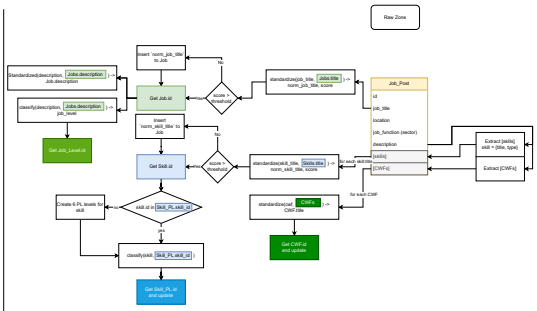
https://docs.cloud.google.com/bigquery/docs/table-snapshots-create#bq

- Snapshot takes a "snapshot" of the whole table and preserves it as is.
- Read-only
- Cost-effective (because of read-only)

V3.1

- Add `Job_Function` table and `Job.job_function_id`.
- Complete the ER diagram
- Add versioning feature



Todo


- versioning as a dataset version
- modify the versioning process to make it as a snapshot behavior
